PROFILE

Security executive who has built three security businesses from the ground up, and a red team operator who still writes the tools. 16+ years spanning live offensive cyber operations with U.S. Special Operations, red teaming at Deloitte, and executive leadership through an acquisition. Turns real attacker capability into business risk that boards act on.

SELECTED ACHIEVEMENTS

- Co-founded and exited **Emulated Criminals**, a Red-Team-as-a-Service firm **acquired by Suzu Labs**
- Scaled Echelon Risk + Cyber from **3 to 40 employees** in under two years and grew its offensive service line **165% YoY**
- **DEF CON Black Badge**; one of **seven inaugural DEF CON trainers**
- Grew U.S. revenue **300%** building CovertSwarm's Americas operation from zero
- Discovered a **0-day**; built an obfuscator that defeated **90% of tested antivirus**
- **14 national media features** in six months: The Register, TechRadar, The Epoch Times

PROFESSIONAL EXPERIENCE

Chief Operating Officer · Suzu Labs

04/2026 – 10/2026 · Remote

- Led the post-acquisition integration of Emulated Criminals into Suzu Labs, carrying its IP, service lines, and delivery operations into the parent company.
- Cut operational drag and legal exposure by rebuilding sales, delivery, and contracting processes and standardizing MSAs and SOWs; authored company strategy.
- Earned 14 national media features in six months as a primary company voice, with expert commentary in The Register, TechRadar, Infosecurity Magazine, The Epoch Times, and AOL.
- Doubled as lead operator, scoping, executing, and briefing penetration tests and red team engagements end to end.

Course Developer & Instructor · Just Hacking Training (Contract)

01/2025 – Present · Remote

- Created the six-course Windows Malware Development series and the Hack a Water Tower ICS hack-along; built a low-cost physical ICS platform demonstrating Modbus exploitation.

Co-Founder & CEO · Emulated Criminals (acquired by Suzu Labs)

09/2022 – 04/2026 · Remote

- Grew a red team tooling shop into a full-service, human-led Red-Team-as-a-Service firm priced like automation, culminating in its acquisition by Suzu Labs.
- Architected and led development of EC RallyPoint, a three-part purple teaming ecosystem (desktop client, web client, managing server) built with Electron, React/Next.js, C#, Auth0, and gRPC.
- Scaled a multi-state offensive security practice whose workflows outpaced competitors on reliability and client trust, advising on NYDFS, SOC 2, HIPAA, PCI DSS, and FedRAMP.
- Designed and validated advanced attack techniques, including ADS-staged ransomware and browser credential collection, so defenders could counter criminal tactics before they spread.

Director, Offensive Security, Americas · CovertSwarm

07/2024 – 03/2025 · Remote

- Grew U.S. revenue 300% by establishing and expanding the UK firm's Americas operation as part of its global expansion strategy.
- Closed subscription services with 10 new clients as U.S. Service Delivery Lead, owning the full sales lifecycle from unqualified lead to delivery handoff.
- Led sales and delivery teams across four countries to one delivery standard and served as primary liaison to the UK executive team on strategy, compliance, and cross-border execution.

Director, Offensive Security · Echelon Risk + Cyber

04/2021 – 07/2024 · Remote

- Helped scale the firm from 3 to 40 employees in under two years as its founding manager.
- Delivered 165% year-over-year gross revenue growth as Service Delivery Lead for offensive security, a service line profitable within its first year.
- Advised 100+ clients, from startups to the Fortune 500, as trusted advisor and vCISO, guiding PCI DSS, HIPAA, SOC 2, and ISO 27001 compliance.
- Reduced reliance on external tooling by leading offensive R&D, including a kernel-level shellcode loader that evaded antivirus on red team engagements.
- Built and taught a 48-hour malware development curriculum in C++ and Python3; selected as one of seven inaugural DEF CON trainers (DEF CON 30).

Senior Specialist, Red Team Operator/Lead · Deloitte Risk and Financial Advisory

09/2018 – 04/2021 · Raleigh, NC

- Cut a required recurring task from 120 man-hours per week to 5 minutes by directing a Python team that built RiskIQ automation.
- Built an in-memory PowerShell post-exploitation framework whose obfuscator defeated 90% of tested antivirus products.
- Discovered a 0-day in a Radio-over-IP network server during an OT penetration test; reported to and resolved by the vendor.
- Managed an 8-person team delivering penetration, physical, red team, and purple team testing to a nationwide client as a member of the Deloitte Global Red Team.

Information Operations Security Researcher · Joint Communications Unit, Cyber

07/2016 – 10/2018 · Fort Bragg, NC

- Conducted real-world offensive cyber operations supporting the find, fix, and locate of high-value targets in terrorist organizations.
- Researched OT and ICS vulnerabilities and served as liaison from Joint Special Operations Command to DoD and intelligence agencies.

Special Operations Communicator · Joint Communications Unit, ECS

10/2013 – 07/2016 · Fort Bragg, NC

- Conducted no-notice special operations missions directed by U.S. Special Operations Command, running C4I systems and managing 587 assets valued at $5 million.

Enterprise System Administrator · U.S. Air Force, 561 Network Operations Center

03/2010 – 10/2013 · Hickam AFB, HI

- Secured a $650 million network spanning 13 time zones and 10 bases, serving 40K command-and-control systems across the Pacific Air Forces.

EDUCATION

Certifications: Offensive Security Certified Professional (OSCP) · CompTIA Security+

Courses: JCU/JSOC Special Operations Radio Operators, Special Operations Network Operators, and Offensive Cyber Network Operators Courses
